

Auto Headlight

Light your way to a bright and safe journey every time!

Have you ever forgotten to turn on your headlights ?

Are you a hazard on the road? Often enough, many drivers forget to turn their vehicle headlights on when it gets dark, making them a safety hazard, both to themselves as well as the vehicles around them.

The Auto Headlight acts as an automatic prompt, activating the car headlights when there's insufficient light source, so that you are assured of a brightly lit road ahead at all times.

023459

■ ■ Advantages:

- Road ahead is brightly lit at all times.
- Drivers are alerted during dark conditions.
- Decreases distractions, allowing drivers to concentrate on safe driving.
- Ensures visibility of vehicle on the road even on gloomy days.
- Headlights are automatically switched on in required circumstances.

■ ■ Function:

The Auto Headlight light sensors are mounted on the vehicle windscreen. These sensors constantly monitor the amount of light, detecting when there is insufficient light to activate the headlight as well as dashboard light during such circumstances.
