

LED Head-Up Display

A revolutionary driving aid that helps you concentrate on the road ahead, ensuring a safe journey every time!

Did you know?

A 1 second glance at the vehicle speedometer while driving at 100km/h means driving blindly for 28 metres!

Keep your eyes on the road at all times!

Adopted from military and commercial aviation technology, DK Auto's LED Head-Up Display (HUD) is an innovative safety device that projects the speedometer on the front windshield, allowing the driver to look straight ahead on the road.

The system also provides an audible and visible warning to driver, alerting him / her when preset speed limits are exceeded.

Initially a feature found only in luxury car models, DK Auto's HUD is now a safety device that is available as a retro fitting for most vehicles.

■ Features:

- Vehicle speed display range from 0- 250km/h.
- Resetable speed limit warning.
- Compact design.
- Adjustable brightness according to the ambient light source.
- 3-pole connection cable.

■ Advantages:

- Ensures safe driving.
- Wide range of applications.
- Easy installation.

■ Technical Specifications:

Daytime operation

Night time operation

Technical Description	Specification
Operating voltage	DC 10V~15V
Operating current	350mA (Max)
Power consumption	4.2W @ 12V (Max)
Speed ranges	0 ~ 255Km/Hr
Operating temperature	-20°C to 85°C
Max. brightness	5000cd/m ²
Weight	39.5±g +
Dimensions	75 x 44.5 x 17.5 ± 0.2mm (LxWxH)
