

# Safety Film

*The top-notch Safety Film offers maximum protection from vandalism and break-ins.*

## Did you know?

According to the police, approximately 60% of light passenger vehicle break-ins occur through the glass. The police also believe that a 10 second delay in entry is an adequate car-theft deterrent.

## ***Enhanced security for your car***

Car glass windows are often susceptible to various types of damage and breakage – whether by accident, natural hazard or criminal act. They can become extremely dangerous, even deadly, when shattered, even more so if the broken shards of glass fly through the air upon impact.

DK Auto's range of automotive safety films is the ultimate in safety and comfort. It acts like a steel curtain to hold shattered glass in place, protecting the driver and passengers from serious harm. It is invisible, yet it blocks 99% of harmful UV rays; an elegant, yet practical means to protect you and your family.

## ■ Advantages:

### Additional protection during an road accident

A heavy impact will cause the car window to shatter. It is extremely dangerous, even deadly, when the interior of a vehicle is showered with glass particles. DK Auto's Automotive Safety Film can reduce the risks of injury from flying glass substantially by holding a broken window together, keeping you and your family safer and better protected at all times.

### Roll-over protection

When car windows shatter during a vehicle roll-over, it is possible for drivers or passengers to be wholly or partially ejected from the cabin, exposing the driver and passengers to the risk of serious injuries. DK Auto's Automotive Safety Film provides an excellent barrier should a roll-over incident occur, helping to protect your family from serious injury.

### Anti car-jacking

DK Auto's Automotive Safety Film provides valuable protection from car-jackers who may try to smash their way through a side window, whilst you are driving your car. Our automotive safety films provide a much-needed deterrent to vandals. Even after being smashed, the safety film will help hold glass panes in place and prevent easy entry.

### Human threat protection

DK Auto's automotive safety film is designed specially for use in a vehicle's side and rear windows, creating a barrier of defense against smash-and-grab thieves. As most thieves tend to break through a side window when stealing from a vehicle, our automotive safety films provide a resistance and slow a thief down significantly so that in most cases he will simply abandon his attempts.

### Protection from the sun

DK Auto's automotive safety films cut off 99% of UV radiation, protecting the driver and passengers, especially babies and young children, from its harmful effects. It is extremely useful in preventing UV-related skin cancers and ailments.
